

SIKA AT WORK

JOSSE LOCUS, SCHEPDAAL, BELGIUM

FLOORING: Sika® Ucrete® MF

BUILDING TRUST

RENOVATION OF PRODUCTION AREA

PROJECT DESCRIPTION

Project name: Josse Locus
Location: Schepdaal
Year: 2009
Size: 2000m²

Josse Locus Bakery prefers to be known as an artisan bakery rather than an industrial bakery when working with natural ingredients, good butter, farm-fresh milk, and eggs they crack themselves. Over time, demand increases, and the customer base grows. The bakery not only serves individuals but also supermarkets, relaxation homes, hospitals, and more.

PROJECT REQUIREMENTS

To meet growing demand, it was necessary to increase production capacity. Additionally, renovation of the old tiling was required. The primary requirement was to quickly resume production. The floor experiences heavy loads and high thermal stress. The new floor should be resistant to these stresses. Furthermore, the floor must meet HACCP requirements and be easy to maintain.

SIKA SOLUTIONS

As bakeries are dry environments, we recommended Sika® Ucrete® MF, a high-performance polyurethane-based flooring system. This floor system is perfect for dry environments. Sika® Ucrete® MF is resistant to impact and thermal loads. With its seamless surface, this floor is easy to maintain. Thanks to a short-term installation, production could be resumed quickly.

PROJECT PARTICIPANTS

Project Owner: Josee Locus
Applicator/Contractor: Stefaan Holvoet
